Provide the email address where we will ship your list _____

- Pre-registration lists are available for purchase by exhibitors or sponsors; others may purchase the post-conference list.
- The number of names available (the counts) changes throughout the registration period and opt-outs are excluded. Your final count and actual cost will be confirmed before your order ships to provide your printing and postage quantity.
- **These are POSTAL lists for one-time direct mail use only; no phone, fax, or email included or permitted.**
- Your sample mail piece is required before your order can be confirmed. If you plan to use the list for reference only, provide a statement to that effect.

What is your scheduled **Mail Date?** _____

Your **Need-By Date?** _____

A DIVISION OF MARKETING GENERAL INCORPORATED

We offer some basic guidelines to help improve the deliverability of your message to an email list managed by MGI.

Guidelines Group 1, to help your message avoid being marked as SPAM.

- Avoid using exclamation points (!), dollar signs (\$), and ALL CAPS in the subject line.
- Keep your subject line brief and to the point.
- Avoid using exclamation points (!) and dollar signs (\$) in the email body.
 - Limited usage is okay; avoid repeated usage.
- Avoid SPAM trigger words in the subject line or email content.
 - Examples of these are “free,” “guarantee,” “guaranteed,” “dear,” “50%,” “100%,” “click,” “click here.”
- Use an equal balance of images and text.
- Use alt tags (alternative text tags) on all images.
 - These tags will display if the recipient has disabled images.
 - This will increase the ratio of text-to-images and help SPAM filters determine the email content.
- **Avoid putting text inside images.**
 - Email clients cannot read text embedded within images, so when an email has little other text it is typically marked as SPAM.

Guidelines Group 2, to help your message deliver successfully across many email clients in popular use (including Microsoft, Gmail, Hotmail).

- Use standard HTML. Do not use Javascript.
- Use alt tags (alternative text tags) on *all* images. These tags will display if the recipient has disabled images.
- Avoid setting image width or height.
 - Most email programs will only display images in their true size.
 - It is best to include the image height and width settings to keep the email spaced properly when images are disabled.
- Avoid using background images.
 - Most email programs will ignore background images.
 - If you do use background images, be sure to set a default background color.
- Use nested tables for the email layout.
 - CSS is a style sheet language used for defining the formatting of a document. Most cascading style sheets (or CSS) styling will not render correctly.
 - Avoid left and right margin settings. Those settings will be ignored by many email programs.
