FreeKick

www.FreeKick.bank

The only premium identity protection for the whole family that simultaneously builds credit

Every 30 seconds a student becomes the victim of identity fraud

Get FREE FDIC-insured identity protection for staff and their families — and protect students in your district

We partner with foundations and PTOs to create a **recurring source of income for schools** in addition to **protecting your district's staff and their families**

**Partner with us:
hello@freekick.bank**

When your school or parent-led organization partners with us, **we make a cash contribution for every FreeKick account that is opened, with additional recurring donations every year an account remains open**

We protect your staff and their families as a free benefit, we ask that you spread the word about FreeKick to your district

**SMALL PAYMENTS
= BIG IMPACT**

If just 700 families in your community have accounts K-12, that's **over \$100,000 in cash donations**

**Partner with us!
hello@freekick.bank**

FK Video

We will match your interest rate investment indexed to fed rate when you complete your deposit. This will ensure your entire staff has identity protection and credit building through FreeKick, and you're still gaining interest on your deposit.

Safety Suite for K-12 Schools

Intrado has leveraged over 40 years of 911 innovation and expertise to design the most advanced set of school safety solutions available for K-12 schools and districts. Safety Suite addresses emergencies from every angle with an end-to-end safety management platform, making safety management easier, crisis communications more effective, and emergency dispatch faster and more accurate.

Make Every Second Count

Safety Suite is an end-to-end emergency solution to prevent, prepare for, respond to and recover from any kind of threat with a comprehensive set of tools built for keeping schools, students and staff safe.

- Customizable event triggers from active shooter, suspicious activity, medical and more.
- Wearable panic button with triple redundancy and LTE coverage for including offsite events like field trips and sporting events
- Real-time reunification, attendance and drill management
- Store and share floor plans, SOPs and ERP checklists
- One and two-way chat feature with the ability to add images and videos
- Critical event information delivered direct to emergency dispatchers through ALI stream

Intrado Safety Suite is comprised of best-in-class solutions that bring unrivaled protection when used in concert with each other.

Intrado solutions are backed by an unmatched position in the 911 ecosystem, ensuring emergency requests for assistance reach the right first responders quickly with accurate location and incident details.

40+

Years of 911 innovation and expertise.

6000+

Connections to PSAPs across North America

410M+

911 requests for assistance delivered a year

Unified IP-based Alerts, Bell Scheduling, Paging & Notifications

Manage communications and broadcast messages – to all on-campus screens and IP-based endpoints or create geofenced parameters for custom alerts in localized areas – all from a central hub.

- Computer desktop takeovers for emergency alerts
- Quickly address severe weather, hazardous conditions, or any other emergency scenario
- Leverage existing IP devices like phones, speakers, and desktops for paging and notifications
- Easily manage school bells and announcements across the district
- Alert visual display boards, TV monitors, strobe lights, and PA systems to help visitors and students visually understand emergency broadcasts
- After-hours motion detection alerts provide added security

Visitor Management

Track, screen and keep record of school guests to know who is safe and who is not, control building access, manage visitor check-in and check-out, and limit the amount of time that people can spend on campus.

- Unlimited sex offender checks from the most respected registry in the industry
- Customizable visitor risk registries
- Staff-operated check-in and self-service check-in options depending on your needs
- Send alerts to staff when a flagged visitor arrives on campus

Wearable 911 Panic Button

With triple redundancy through BLE, WiFi and Cellular/LTE, extended battery life, and daily health checks, staff can access services – on campus, in transit or at offsite events – with features that save valuable time and transmit critical data.

- Simultaneously submit a 911 request for assistance while silently notifying staff campus-wide with haptic vibration
- Instantly initiate building or campus lockdowns and easily cancel false alarms
- Location data, incident details, floor plans and more are automatically shared with the 911 center
- Full compliance with Alyssa’s Law with wearable, desktop, mobile and mounted options

Enterprise 911

E911 services automate and simplify call routing and location management for FCC and state mandated E911 compliance.

- Comply with all state and federal regulations including Kari’s Law and RAY BAUM’s act
- Ensure 911 calls are quickly routed to the proper jurisdiction and include precise dispatchable location data
- Connectivity to over 6000 Public Safety Answering Points (PSAPs) across North America
- Compliant with all major IP-PBX platforms for seamless integration and interoperability

For a truly complete and integrated approach to safety threat response, make Intrado Safety Suite a central piece of your emergency response strategy.

About Intrado

Intrado is a global leader in public safety, providing software systems and services to the public safety community worldwide. With over forty years of experience in enabling emergency communications, Intrado delivers market-leading solutions that connect those in need with those who can best help them. Intrado's technology-driven solutions are designed to be robust, resilient, intuitive, and insightful, ensuring that emergency responders can quickly and effectively provide assistance when it is needed most. Intrado's mission is to save lives by improving public safety outcomes.

Wearable Panic Button

Leveraging more than 40 years of 911 expertise and innovations, Intrado's Wearable 911 Panic Button offers a technologically advanced approach to safety devices with a unique set of features and smart design.

The Wearable 911 Panic Button is part of the Intrado Safety Suite, a comprehensive set of solutions for end-to-end incident management. With Safety Suite, Intrado helps you prevent, respond to and recover from any type of emergency with services spanning unified alerts of IP-based endpoints, mass notifications, visitor management, reunification and more.

A Modern Approach to Wearable Safety Devices

Intrado's Wearable 911 Panic Button delivers meaningful features that save valuable time and transmit critical data to *make every second count*.

- Notify 911 immediately of an active shooter or other event while simultaneously notifying staff campus-wide by silent haptic vibration with flashing LED lights
- Instantly initiate building or campus lockdowns and easily cancel false alarms
- Customize device activation, types of alerts and which alerts notify 911
- Location data, incident details, floor plans and more can be automatically shared with the 911 center

Intrado Safety Suite is comprised of best-in-class solutions that bring unrivaled protection when used in concert with each other.

Intrado solutions are backed by an unmatched position in the 911 ecosystem, ensuring emergency requests for assistance reach the right first responders quickly with accurate location and incident details.

40+

Years of 911 innovation and expertise.

6000+

Connections to PSAPs across North America

410M+

911 requests for assistance delivered a year

Unrivaled Connectivity

Rest assured that staff can access services whether on campus, in transit or at offsite events.

- Bluetooth Low Energy (BLE), WiFi and Cellular/LTE for 100% connectivity
- Extended life rechargeable battery
- Daily device health checks with dashboard results for added peace of mind

Compact Design

The Wearable 911 Panic Button is an ID-badge-sized device that can be configured for different scenarios and branded for your organization.

- Programmable options for various emergency types
- Lightweight design does not interfere with daily activities
- Color and personalized logo options available

Safety Suite for K-12, Higher Education, and Enterprise

Intrado Safety Suite has desktop, mobile and mounted panic button options as well as features that align with the unique needs of K-12 schools, higher education institutions, or businesses – including solutions that address state and federal Enterprise E911 regulations and Alyssa’s Law compliance.

Intrado Safety Suite is comprised of best-in-class solutions that bring unrivaled protection when used in concert with each other. Intrado solutions are backed by an unmatched position in the 911 ecosystem, ensuring emergency requests for assistance reach the right first responders quickly with accurate location and incident details.

- Over 40 years of 911 innovation and expertise
- Connections to over 6000 Public Safety Answering Points (PSAPs) across North America
- Delivering over 410 million 911 requests for assistance a year

For a truly complete and integrated approach to safety threat response, make Intrado Safety Suite a central piece of your emergency response strategy.

Industry Problem:

Most districts are not providing their schools with streamlined technology solutions

Who is Kokomo24/7®?

- ✓ We help districts implement and manage student health, safety, and well-being initiatives.
- ✓ Partner with Los Angeles Unified School District since 2018.
- ✓ Partner with Chicago Public Schools.

Solution:

Why Districts Work with Kokomo24/7®?

Most comprehensive health, safety, and operational software platform available

- ✓ Cost savings up to 35% when switching to the Kokomo platform.
- ✓ Districts realize immediate impact to students and school community upon rollout.
- ✓ Centralized repository, one source, for all data, even from different Kokomo module functionality.
- ✓ Data coherence and transparency, while meeting compliance requirements.
- ✓ Modular platform allows for future growth in or out of Kokomo software modules without down-time or training.

🌐 www.kokomo247.com

	Incident Management	Anonymous Reporting	Emergency Alert
Problem	Districts don't have one centralized dashboard to track and monitor student and school incidents.	Districts don't provide students with a mobile, text-based, system to report dangerous behavior or leakage to school administrators.	Districts are not equipping staff or students with a two-way communication enabled panic button in times of severe crisis including armed assailant.
Solution	<p>LAUSD ISTAR</p> <p>One centralized dashboard to help you collect, track, manage and respond to both the predictable and the unpredictable.</p>	<p>LAUSD LASAR</p> <p>Provides students, staff, and community members with a safe and private way to report concerning behavior.</p>	<p>LAUSD EA App</p> <p>Help ensure the safety of all community members with a way to call for help during times of extreme emergency.</p>

Additional Kokomo Products

	Wellness Tracker	Visitor Management	Communication Management
Problem	Districts often lack the technical resources to securely manage student immunization requirements or provide students with proper health resources.	Districts don't have adequate control of their visitor management perimeter in today's climate of violent.	Districts lack efficient ways to automate messaging tasks or mass communications to their community.
Solution	<p>LAUSD RTS</p> <p>Manage student health and wellbeing with telehealth and records management, in compliance with HIPAA requirements.</p>	<p>LAUSD ACCELERATED DAYS</p> <p>Ensure all visitors are properly tracked through screening tools and option for digital badging.</p>	<p>Help students, staff, and parents to stay informed of important emergency and non-emergency updates.</p>
	Facility Management	Asset Management	Event Management
Problem	Districts can be more efficient with facility management if they integrate with their central data repository.	Districts often lack accountability for their hardware assets and even less accountability for software licenses, leading to an inefficiency of district funds.	Districts often don't implement software management tools when holding events to manage the health and safety of attendees.
Solution	<p>LAUSD TECH DISPATCH</p> <p>Manage school spaces like desks, rooms, or large gathering areas, easily tracking reservations or requests.</p>	<p>Manage district technology devices licenses, and service or repair tickets.</p>	<p>LAUSD SUPE'S ADDRESS</p> <p>One comprehensive tool to help streamline event management.</p>
	Observation Management	Patrol Management	Ridership Management
Problem	Districts often don't have a single repository to visualize all of their data points.	Districts need accountability for asset patrolling on such things as bus yards, parking lots.	Districts often lack accountability for student bus ridership tracking.
Solution	<p>Assess educators in the classroom, easily tracking observations in one integrated database.</p>	<p>LAUSD PATROL</p> <p>Track and manage employee patrols or inspections of sites and facilities.</p>	<p>Securely track students' safe passage onto and off of school buses.</p>

NGS

DEFEND YOUR GLASS

Prevent or delay active shooters from entering through glass doors and windows with security window film from NGS.

Security camera footage from the Nashville tragedy horrifically demonstrated the vulnerability of unprotected glass. Like Sandy Hook, the perpetrator gained access to the building in seconds by shooting the glass doors.

Is your glass vulnerable?

Defend your glass with security window film from NGS. Recommended by the Federal Commission on School Safety, the Sandy Hook Advisory Commission, and the Texas Education Agency, security window film can:

- Delay entry
- Reduce visibility
- Contain spall (shattered glass)

NGS is the nation's leading glazing security contractor offering building security assessments and have a team of consultants who are dedicated to locating and procuring grant money. We have successfully protected vulnerable glass in hundreds of school districts nationwide, and offer streamlined procurement via our EDGAR-compliant cooperative purchasing agreements and government contracting vehicles.

Scan the QR code to learn more about glazing security and how to protect your students and staff from a breach through glass doors and windows.

ACTIVE SHOOTER PROTECTION

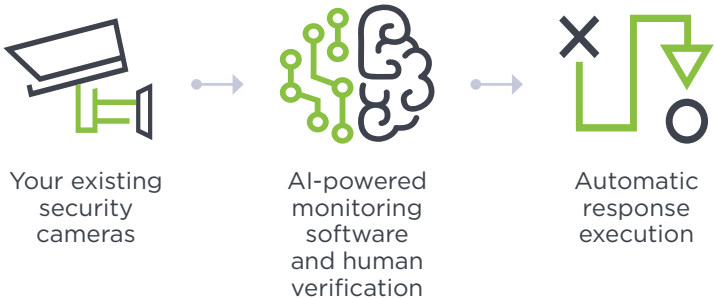

The Only AI Visual Gun Detection
Solution with Automated Response and
Emergency Notification

IDENTIFY GUN THREATS AT FIRST SIGHT

Gun violence and active shooter incidents are on the rise in the United States. How are you responding to these increasing threats? More security guards? More cameras? Who's watching existing video feeds? New threats call for new layers of protection.

Omnilert Gun Detect taps into existing cameras to identify hand guns and long guns 24x7. At the first sight of a gun, it sends an alert nearly instantly for human verification, which can be done flexibly by your own team, Security Operations Center, or using Omnilert's monitoring service. Once confirmed, activate your action plan at the touch of button - lock doors, notify police, and send notifications to those in harm's way.

Omnilert Gun Detect is the only cost-effective, end-to-end solution offering reliable visual gun detection, flexible human verification, and automatic safety system activation.

At Omnilert, we believe that early threat detection and rapid response are crucial to the success of any modern safety system.

STOP ACTIVE SHOOTERS **BEFORE THEY ENTER**

Without question, the best scenario is to stop an active shooter before they gain access to your facility. Unfortunately, this rarely happens. Take the 2022 Safeway shooting in Bend, OR; Tops supermarket mass shooting in Buffalo, NY; or the school shootings in Uvalde, TX or Nashville, TN as examples. In all cases, the shooter was first spotted outside with a fully brandished weapon.

Omnilert Gun Detect could have detected those gun threats and responded by automatically locking facility doors and notifying police before the gunman made it to the entrance. **Only AI visual gun detection can bring protection inside and outside your facilities.**

STEP 01 DETECTION

DETECT WEAPONS RELIABLY WITH PROVEN AI TECHNOLOGY

Reliable detection is the cornerstone of Omnilert Gun Detect. Gun Detect uses advanced AI algorithms to analyze video from existing security cameras in real time. Our approach relies on high-quality, 100% organic training data to reach the highest levels of accuracy and reliability.

Our technology can identify guns in a wide range of environments, from interiors to crowded outdoor spaces. **Unlike simplistic image recognition, Gun Detect has a multi-step process that recognizes a body, then looks for a gun and the physical behavior consistent with gun violence.**

Whether you're securing a school, office, or government facility, Gun Detect provides the detection capabilities you need to keep your people safe.

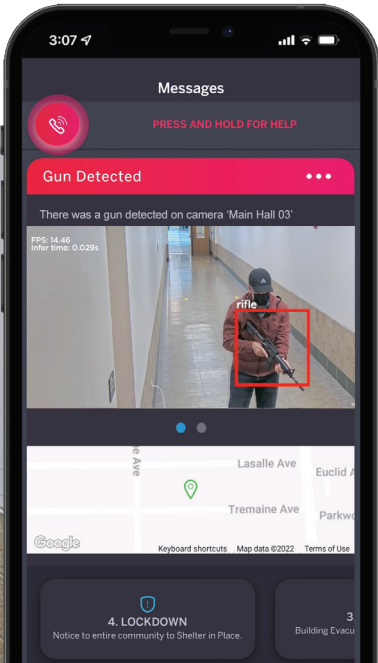

STEP 02 VERIFICATION

FLEXIBLE VERIFICATION OPTIONS SUPPORT YOUR WORKFLOWS

There's always a human in the loop to verify gun detections. **In less than a second, a notification showing a still image of the detection, close up of the gun and video along with a map, camera name and precise location is sent to the designated team.**

With Omnilert Gun Detect, you are given the flexibility to choose your verification methods. Whether you select Omnilert Monitoring, your own security operations center (SOC) or internal teams, a combination of these, or even a third party service of your choice, our open platform was designed to support you and your changing needs.

STEP 03 ACTIVATION

ACTIVATE A FULL SCALE EMERGENCY RESPONSE IN SECONDS

In addition to activating a police response, Omnilert Gun Detect can orchestrate a full-scale lockdown using your existing systems and tools. By turning your written response plans into pre-defined, scripted workflows, **our platform can automate your response and safety systems with speed and precision.**

With Omnilert Gun Detect, you can be confident that your response to a gun threat will be rapid, efficient, and effective, helping you to protect your people and keep them out of harm's way.

STEP 04 NOTIFICATION

INSTANTLY NOTIFY POLICE, STAFF, AND OTHERS IMPACTED

Once a gun threat is verified, fast and effective communication is paramount. Omnilert Gun Detect facilitates communication directly or through off-the-shelf integrations, allowing you to communicate automatically and efficiently with those in harm's way and your broader communities.

With comprehensive multi-channel communications, you can share intelligence beyond mass text, email, and voice notifications. **Our platform integrates with alarms, communications platforms, digital signage, emergency lighting, social media, websites and more to ensure your alerts reach your audience as soon as possible.**

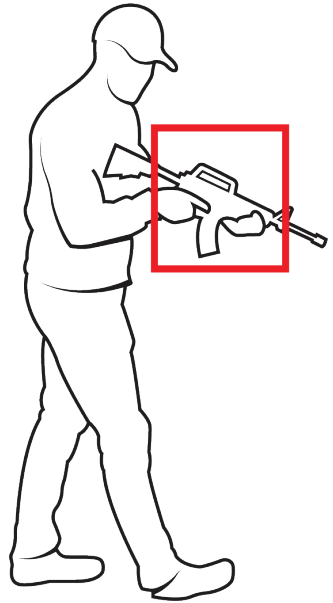

For those on-site, use the platform to provide clear and actionable information on where to go and what to do to stay safe. For those off-site, it's guidance on staying away, staying secure, and getting updates over time.

MILITARY-GRADE AI TECHNOLOGY

Omnilert Gun Detect utilizes state-of-the-art artificial intelligence technology with its roots in the U.S. Department of Defense and DARPA. **This military-inspired AI technology was originally born from experience with real-time target recognition and threat classification for the battlefield.**

Omnilert's data-centric AI methodology prioritizes high-quality training data vs. the highest volume of images. 100% organic training data has been used since development began in 2018. We don't employ synthetic data, gaming engines or other methods such as studios and green screens. We train only with video from actual cameras in live environments to achieve the best results.

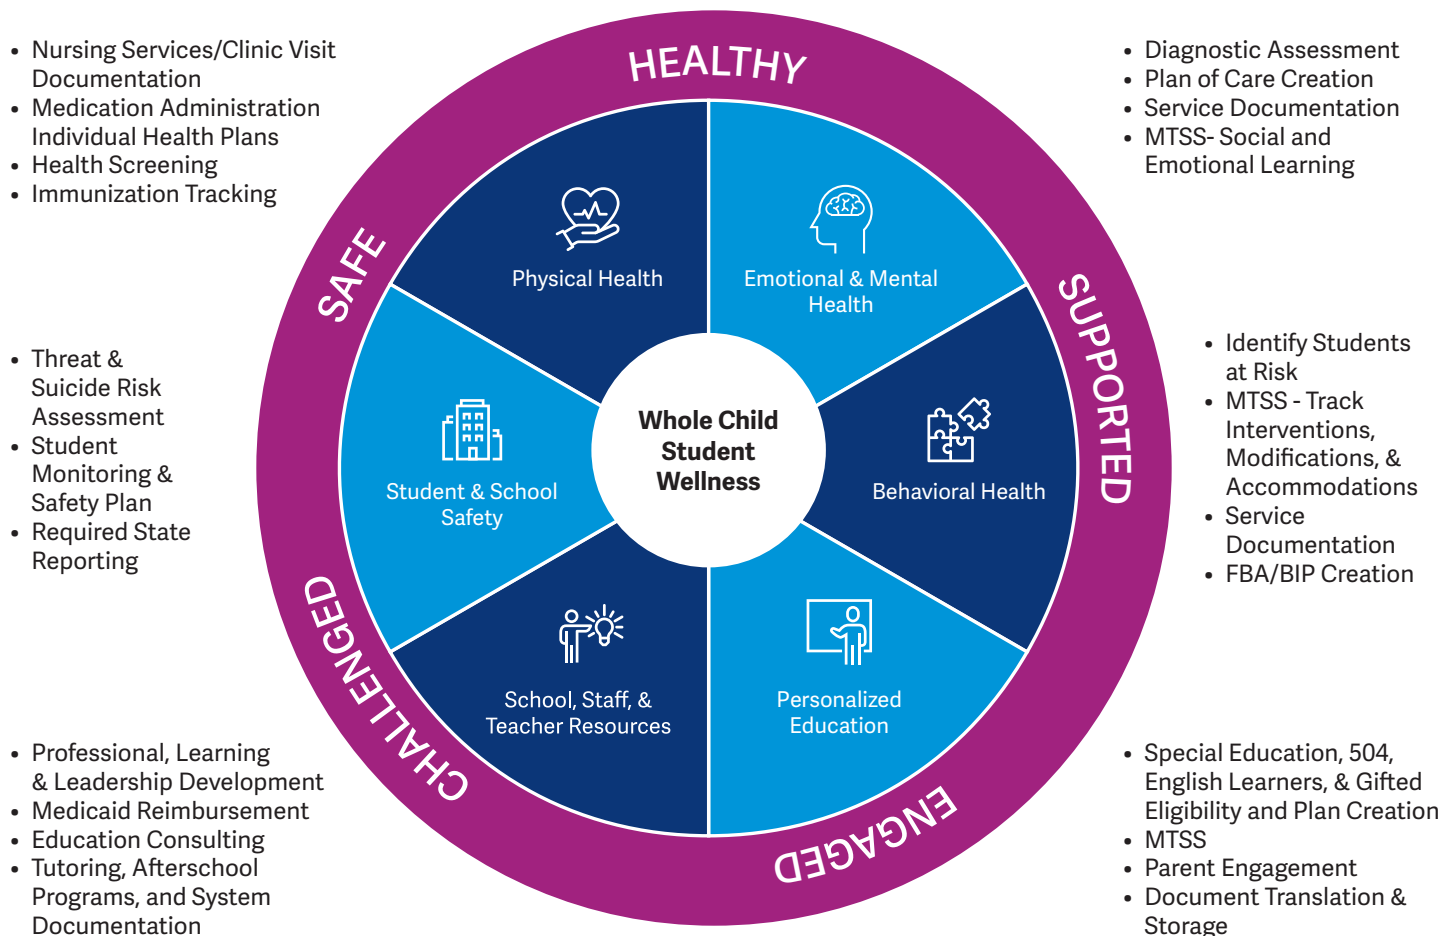

If you are interested in learning more about how Omnilert Gun Detect can help protect your organization, **schedule a demo today!**

PCG Education Solutions

Public Consulting Group (PCG) offers consulting services and technology solutions that help schools, school districts, and state education agencies and ministries of education to promote student success, improve programs and processes, and optimize financial resources.

Our whole child approach focuses on addressing student success across a variety of areas, including physical health, emotional and mental health, behavioral health, personalized education, and school safety.

We have proven experience in working with K-12 schools to integrate and adopt solutions that guide processes, organize supports, focus attention, and document progress to keep youth healthy, safe, engaged, supported, and challenged.

For more information about PCG's education solutions, speak to our team at Booth #1644.

The Raptor School Safety Suite of Products

Giving you EVERY advantage when it comes to protecting your schools

PREVENT.

RAPTOR® VISITOR MANAGEMENT

Decide who is allowed on your campus and who can leave with a student.

RAPTOR® STUDENTSAFE™

Create a chronology of proactive concerns for an individual student so authorized staff has a holistic view of an individual student's wellbeing.

RAPTOR® VOLUNTEER MANAGEMENT

Simultaneously reduce the effort and scale the impact of your volunteer program—all while following your safety protocols.

RAPTOR® SCHOOLPASS ATTENDANCE

Modernize your classroom attendance-taking practices with automated per-period attendance and hall passes.

RAPTOR® SCHOOLPASS DISMISSAL

AI-based, automated dismissal solutions including car line, bus management, after school programs, and more.

RAPTOR® EMERGENCY MANAGEMENT

Effectively manage drills, instantly notify first responders, accurately account for individuals and safely reunify families.

PREPARE.

RAPTOR® DRILL MANAGER

Part of the Raptor Emergency Management Solution, Drill Manager prepares staff, students and first responders for any emergency by practicing and learning from the drills.

Initiating

RECOVER.

RAPTOR® ACCOUNTABILITY

Connected with your student information system, Raptor enables staff to account for themselves and students directly in the Raptor mobile app while providing real-time status and location information.

RAPTOR® REUNIFICATION

Connected to your student information system, Raptor helps ensure students are quickly and safely reunified with only approved guardians.

RESPOND.

RAPTOR® PANIC ALERT

At the center of the Raptor Emergency Management Suite is Raptor Alert, a silent panic alert system that works on the wired, wireless or cellular devices your schools and staff use every day.

About Raptor

Raptor has partnered with 52,000+ schools globally, including 5,000+ U.S. school districts, to provide integrated visitor, volunteer, automated attendance and dismissal, emergency management, safeguarding, and early intervention, software and services covering the full spectrum of school and student safety.

This can't wait.
